Major ISP Acquisition

4 July 2005

Datafast Telecommunications Ltd (**ASX: DFT**) announced today that it has acquired the VianetAIP group of ISPs from Comdek Limited (**ASX: CDS**).

The WA based group includes a number of brands and is a leading provider of corporate Internet services, boasting an impressive list of clients throughout Australia.

Datafast CEO Simon Ehrenfeld said today that the acquisition has “put legs on” the Corporate Division established in 2004.

“We are now in the Australian Top 10 in all three ISP segments – the corporate space, the retail space and the wholesale space,” he said.

“VianetAIP has a winning strategy with very high average revenue per subscriber. We intend to replicate their formula across our national corporate network.”
