

Exciting Entry into the Uranium Market for Clean TeQ

Clean TeQ Holdings Limited (ASX: CLQ), an Australian technology company in resource recovery and air and water purification, today announced that the Company has entered into an agreement to construct a Clean-iX® Resin-In-Pulp Pilot Plant at the Langer Heinrich uranium mine in Namibia owned by Paladin Energy.

'This Pilot Plant will demonstrate the Clean-iX® Resin-In-Pulp (cRIP) technology for uranium extraction. This technology has been developed to deliver improved returns from a uranium resource and reduce the environmental impact of processing plants,' Clean TeQ's Chief Executive Officer, Greg Toll, said.

'This is an exciting development as it is the first agreement entered into by Clean TeQ in the uranium mining industry. It provides the next stage of development of the Clean-iX® technology and enhances our credibility in the uranium sector and recognises Clean TeQ's expertise in this high growth industry. The agreement is also further evidence of the ongoing developments that we are achieving in our resource recovery division,' said Mr Toll.

New Appointments

With Clean TeQ continuing to invest in the development of resource recovery technology, the Directors are pleased to announce that the Company has strengthened its resource recovery management team with Bob Cleary and Werner Haymann now working with the Company's resource recovery division.

Bob Cleary has extensive senior executive experience in the Uranium industry where he rose to the position of CEO of ERA. Bob is currently Chairman of Crossland Uranium Mines Ltd, and UMC Energy plc and a Director of Natasa Mining Ltd. He also provides consulting services to these companies.

Werner Haymann's considerable mining operations experience includes past positions as Director and General Manager Operations at Rossing Uranium Limited in Namibia, the MORAK Gold Mining Venture in Mauritania and as General Manager Operations of the Blair Athol Coal Project in Central Queensland.

'These appointments along with the continuing investment by Clean TeQ in this industry will enable the Company to gain considerable value for its Clean-iX® technology in the future,' said Mr Toll.
