

## **Clean TeQ Signs China Water Contracts**

The Directors of Clean TeQ Holdings Limited (**ASX; CLQ**), are pleased to announce that the Company has entered into three contracts with the Protection (Putian) Water Treatment Co. for the design and supply of major equipment for three wastewater treatment plants in the Putian region of China. These three contracts will generate revenue in excess of \$4.8 million for the Company. Commencement of the design and construction of the wastewater treatment plants is subject to final regulatory approval.

“The award of the design and supply of equipment for these wastewater treatment plants in China is a significant milestone in the development of the Clean TeQ Water Division. The successful supply of this technology in China provides the Water Division with significant future opportunities across this region,” said Greg Toll, Chief Executive Officer of Clean TeQ.

### **Market Update**

The Directors of Clean TeQ Holdings Limited also advise that economic uncertainty continues to impact on the financial performance of the Company. Accordingly, the Company is now not confident that it will achieve the lower end of the range of its most recent profit forecast for the year ending 30 June 2009. This is as a result of revenue not being recognised in the current financial year due to timing issues and delays in project implementation.

However, some of the revenue not recognised for accounting purposes at 30 June 2009 will have a positive impact on the Company’s cash flow position this financial year.

The Company expects to achieve significant growth in 2010 from revenues currently contracted and a strong pipeline of projects.
