HIGHLIGHTS

QUARTERLY REPORT
Period ending 31 December 2013

Corporate

- On 2 December 2013, Icon Energy successfully raised \$18.8 million through a share placement to Hong Kong-based Company, HK Prosperous Technology Limited (*HK Prosperous*), which is focused on the emerging energy demands in China over the coming decades.
- The placement price of 23.5 cent represented a premium of 62% to the Company's last closing price of 14.5 cents a share. Proceeds from the placement will primarily be used to conduct the 2014 2015 drilling program at ATP 855 in the Cooper Basin in Queensland.
- The Company held the 2013 Annual General Meeting (AGM) on 25 November, with most resolutions carried unanimously and the balance by a significant majority on a show of hands.

Operations

ATP 855

(Beach 46.9% and operator, Chevron 18%, Icon Energy Ltd (Icon Energy) 35.1%)

- On 9 December 2013 the Geoffrey-1 well reached a total depth of 4,125 metres in the Patchawarra formation. Geoffrey was spudded on 14 October 2013 and the results of Geoffrey-1 have been very encouraging with good gas shows throughout the Permian section.
- On 23 January 2014 Redland-1 reached its target depth of 3,804 metres. Redland-1 spudded on 15 December 2013. The Redland-1 vertical well is located 22 kilometres north-west of Geoffrey-1.
- The stimulation program will target specific horizons, where appropriate, to build knowledge of the individual formations. This program will include hydraulic stimulation and extended well testing for Hervey-1, Geoffrey-1, Redland-1 and a sixth well Etty-1, which will be drilled by Q2 2014 and then stimulated.

Financial Position

The total cash balance at the end of December 2013 quarter was \$35.62 million.

At 31 December 2013 Icon Energy had 7,486 shareholders. The \$18.8 million capital raising comprising the issue of 80.3 million new ordinary shares to HK Prosperous brought the total number of Icon Energy shares on issue to 615,774,352. HK Prosperous is now the largest shareholder of Icon Energy with 13.04% of the Company's shares on issue.

OPERATIONS

QUARTERLY REPORT Period ending 31 December 2013

Queensland – Petroleum Exploration – Cooper Basin – ATP 855

On 26 August 2013 Icon announced that Beach Energy, the ATP855 joint venture Operator had engaged a petroleum resource evaluation consultant to undertake a report on contingent resources in the area around the Halifax-1 well. The assessment reported 318 Bcf of 1C, 629 Bcf of 2C and 1,115 Bcf of 3C gross contingent resource. The results from the Halifax-1 well encouraged the joint venture to continue the exploration program and the Company announced that five additional wells would be drilled in ATP 855 prior to October 2014 to meet exploration permit obligations.

The first of the additional wells, Hervey-1, which is located 30km east of Halifax-1 was spudded in May 2013, encountered gas shows and is expected to be hydraulically stimulated in Q2 2014.

The second vertical well, Keppel-1, located 25 km north east of Halifax-1, was spudded in June 2013 and experienced significant gas influx from the over-pressured Epsilon Formation at a depth of 3,898 metres.

The third well, Geoffrey-1, located 36 kilometres to the north-east of Hervey-1, was spudded on 14 October 2013. The Geoffrey-1 well was drilled to evaluate the shale and basin-centred gas play in the Toolachee, Daralingie, Roseneath, Epsilon, Murteree and Patchawarra Formation intervals in the east of ATP 855.

On 9 December 2013 the Geoffrey-1 well reached total depth of 4,125 metres in the Patchawarra Formation. The results of the well have been very encouraging with good gas shows throughout the Permian section. Geoffrey-1 was cased and suspended pending subsequent hydraulic stimulation and flow testing as part of a multi-well stimulation campaign commencing in Q2 of 2014.

The fourth well, Redland-1, is located approximately 18 kilometres north east of Keppel-1 in a structurally deep location in the Nappamerri Trough. Redland-1 was spudded on 15 December 2013 and is designed to specifically address the Toolachee and Daralingie Formations.

Subsequent to the end of the quarter on 23 January 2014, Redland-1 reached total depth of 3,804 metres. The Redland-1 vertical well will be cased and suspended in readiness for the fracture stimulation program in Q3 of 2014.

Following drilling of Redland-1, the Ensign 965 rig will move to the fifth additional well in the drilling campaign, Etty-1. Etty-1 is located approximately nine kilometres east of Halifax-1 and is proposed to be drilled to a total depth of 3800 metres.

All wells drilled within ATP 855 to date, Halifax-1, Hervey-1, Keppel-1, Geoffrey-1 and Redland-1, have confirmed the continuation of the basin-centred gas play in the Nappamerri Trough, with ATP 855 containing the deepest sections of the Trough. Notices of Petroleum Discovery have already been lodged with the Department of Natural Resources and Mines (*DNRM*) for Halifax-1 and Keppel-1.

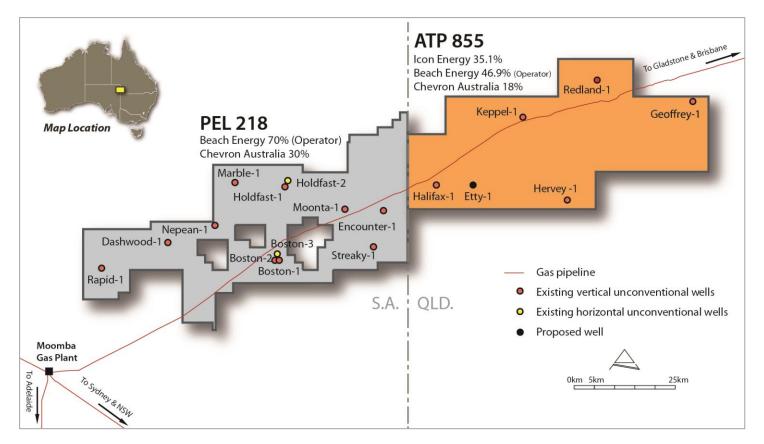

Figure 1: Map showing the unconventional shale gas wells in PEL 218 and Queensland permit ATP 855

The JV is always looking at utilizing the most effective techniques for the Drilling and Completions of its wells including designs that may utilize techniques currently proven in North America.

The 2014 multi-well stimulation campaign of the wells including Hervey-1, Geoffrey-1, Redland-1, and the next well to be drilled, Etty-1, is expected to commence in Q2 2014. Key target reservoirs have been identified for specific zone fracture stimulation and flow tests. These tests are aimed at gathering information on the contribution from individual target zones, which will be a fraction of each well's capability.

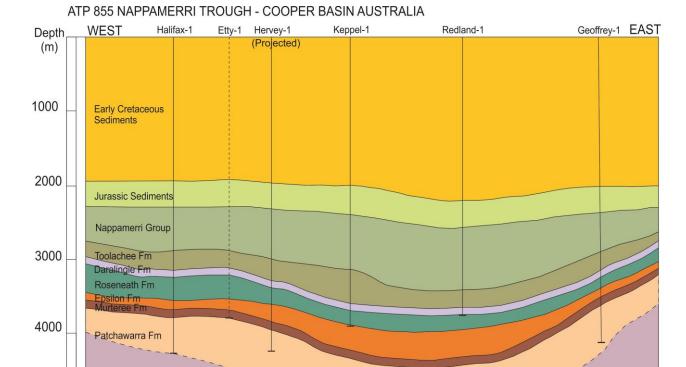

Figure 2: Structural cross section through ATP 855 in the Cooper Basin, Queensland. The Etty-1 well, shown as a dashed line, is the next well to be drilled, subject to JV approval. Hervey-1, which is located southeast of this cross section, has been projected onto the cross section to show its relative position.

5000

Basement

Queensland – Petroleum Exploration – Surat Basin – ATP 626

ATP 626

(Icon Energy 100% and operator)

The Company has initiated a rehabilitation program of old exploration wells that will not be utilized in the future of the permit. The plug, abandonment and rehabilitation of the former ATP 626 Joint Venture wells have now been completed.

The remaining wells in the tenement are Eolus-1, Mindagabie-1 and Stitch-1, which are currently suspended.

Figure 3: Photo showing the ATP 626 Rehabilitation Program nearing completion in the Surat Basin, Queensland

Victoria – Petroleum Exploration - PEP 170, PEP 172 & PEP 173

As at the end of the reporting period the Victorian Government had not lifted the suspension on the use of hydraulic fracturing in coal seam and conventional gas exploration projects in Victoria. Icon has deferred its exploration program in Victoria until the suspension has been lifted.

PEP 170

(Icon Energy 100% and operator)

On 22 July 2013, Icon Energy wrote to the Department of State Development, Business and Innovation (*DSDBI*), requesting an extension and or suspension of the permit conditions until the National Harmonised Framework for CSG is implemented. This request has been approved on 3 October 2013.

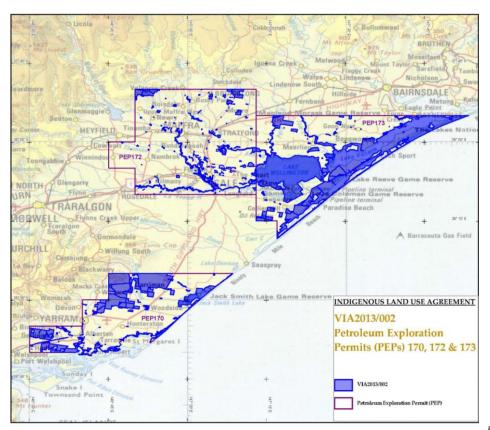

PEP 172 and PEP 173

(Icon Energy 100% and operator when granted)

In accordance with the conditions of grant for PEPs 172 and 173, Icon Energy was required to complete an Indigenous Land Use Agreement with the Gunaikurnai Land and Waters Aboriginal Corporation Registered Native Title Body Corporate (*ILUA*).

The ILUA which covers PEPs 172, 173 and 170 was successfully concluded in August 2013 and registered on 1 November 2013 by the National Native Title Tribunal. The Company looks forward to working closely with our stakeholders in the future development of these tenements when operations are able to start up again.

In October 2013, the DSDBI approved a request from Icon Energy to defer the granting of PEP 172 and PEP 173 until the Victorian Government has responded to and implemented measures in response to the National Harmonised Framework.

ICON ENERGY OTHER TENEMENTS

Basin / Area	Permit / Area	Tenement Area (sqkm)	Permit Interest	Operator	Prospect Type

Notes

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position.

 An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- Issued and quoted securities The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

30/9/2001 Appendix 5B Page 5

⁺ See chapter 19 for defined terms.

- The definitions in, and provisions of, AASB 1022: Accounting for Extractive Industries and AASB 1026: Statement of Cash Flows apply to this report.
- Accounting Standards ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
